Agrément Certificate
09/4697
Product Sheet 5 Issue 2

MAGMATECH LTD

TEPLO BFL WALL TIES

This Agrément Certificate Product Sheet⁽¹⁾ relates to Teplo BFL Wall Ties, basalt fibre composite wall ties for use in tying masonry to timber, OSB, concrete or steel, in-situ masonry, masonry walls with M2 and moderately hydraulic lime mortar and, for Type 1 ties also M12 mortar, in new-build or retrofit constructions with a cavity width up to 400 mm (nominal).

(1) Hereinafter referred to as 'Certificate'.

The assessment includes

Product factors:

- compliance with Building Regulations
- compliance with additional regulatory or non-regulatory information where applicable
- evaluation against technical specifications
- assessment criteria and technical investigations
- uses and design considerations

Process factors:

- compliance with Scheme requirements
- installation, delivery, handling and storage
- production and quality controls
- maintenance and repair

Ongoing contractual Scheme elements†:

- regular assessment of production
- formal 3-yearly review

KEY FACTORS ASSESSED

- Section 1. Mechanical resistance and stability
- Section 2. Safety in case of fire
- Section 3. Hygiene, health and the environment
- Section 4. Safety and accessibility in use
- Section 5. Protection against noise
- Section 6. Energy economy and heat retention
- Section 7. Sustainable use of natural resources
- Section 8. Durability

The BBA has awarded this Certificate to the company named above for the products described herein. These products have been assessed by the BBA as being fit for their intended use provided they are installed, used and maintained as set out in this Certificate.

On behalf of the British Board of Agrément

Date of Second issue: 10 December 2025

Originally certified on 25 November 2021

Hardy Giesler
Chief Executive Officer

This BBA Agrément Certificate is issued under the BBA's Inspection Body accreditation to ISO/IEC 17020. Sections marked with † are not issued under accreditation.

The BBA is a UKAS accredited Inspection Body (No. 4345), Certification Body (No. 0113) and Testing Laboratory (No. 0357).

Readers MUST check that this is the latest issue of this Agrément Certificate by either referring to the BBA website or contacting the BBA directly.

The Certificate should be read in full as it may be misleading to read clauses in isolation.

Any photographs are for illustrative purposes only, do not constitute advice and should not be relied upon.

SUMMARY OF ASSESSMENT AND COMPLIANCE

This section provides a summary of the assessment conclusions; readers should refer to the later sections of this Certificate for information about the assessments carried out.

Compliance with Regulations

Having assessed the key factors, the opinion of the BBA is that Teplo BFL Wall Ties, if installed, used and maintained in accordance with this Certificate, can satisfy or contribute to satisfying the relevant requirements of the following Building Regulations:

The Building Regulations 2010 (England and Wales) (as amended)

Requirement:	A1	Loading
Comment:		The products can contribute to satisfying this Requirement. See section 1 of this Certificate.
Requirement:	B(3)1	Internal fire spread (structure)
Comment:		The products can contribute to satisfying this Requirement. See section 2 of this Certificate.
Requirement:	C2(b)	Resistance to moisture
Comment:		The products can contribute to satisfying this Requirement. See section 3 of this Certificate.
Requirement:	L1(a)(i)	Conservation of fuel and power
Comment:		The products can contribute to satisfying this Requirement. See section 6 of this Certificate.
Regulation:	7(1)	Materials and workmanship
Comment:		The products are acceptable. See sections 8 and 9 of this Certificate.
Regulation:	7(2)	Materials and workmanship
Comment:		The products are unrestricted by this Regulation. See section 2 of this Certificate.
Regulation:	25B	Nearly zero-energy requirements for new buildings
Regulation:	26	CO₂ emission rates for new buildings
Regulation:	26A	Fabric energy efficiency rates for new dwellings (applicable to England only)
Regulation:	26A	Primary energy rates for new buildings (applicable to Wales only)
Regulation:	26B	Fabric performance values for new dwellings (applicable to Wales only)
Regulation:	26C	Target primary energy rates for new buildings (applicable to England only)
Regulation:	26C	Energy efficiency rating (applicable in Wales only)
Comment:		The products can contribute to satisfying these Regulations. See section 6 of this Certificate.

The Building (Scotland) Regulations 2004 (as amended)

Regulation:	8(1)	Fitness and durability of materials and workmanship
Comment:		The products can contribute to a construction satisfying this Regulation. See sections 8 and 9 of this Certificate.
Regulation:	8(3)	Fitness and durability of materials and workmanship
Comment:		The products are unrestricted by this Regulation. See section 2 of this Certificate.
Regulation:	9	Building standards – construction
Standard:	1.1(a)(b)	Structure
Comment:		The products can contribute to satisfying this Standard. See section 1 of this Certificate.

Standard:	2.3	Structural protection
Standard:	2.6	Spread to neighbouring buildings
Comment:		The products can contribute to satisfying these Standards, with reference to clauses 2.3.1 ⁽¹⁾⁽²⁾ , 2.3.2 ⁽¹⁾⁽²⁾ and 2.6.1 ⁽¹⁾⁽²⁾ . See section 2 of this Certificate.
Standard:	3.10	Precipitation
Comment:		The products can contribute to satisfying this Standard, with reference to clauses 3.10.1 ⁽¹⁾⁽²⁾ and 3.10.3 ⁽¹⁾⁽²⁾ . See section 3 of this Certificate.
Standard:	6.1(b)(c)	Energy demand
Standard:	6.2	Building insulation envelope
Comment:		The products can contribute to satisfying these Standards, with reference to clauses 6.1.1 ⁽¹⁾ , 6.1.2 ⁽²⁾ , 6.2.1 ⁽¹⁾⁽²⁾ , 6.2.3 ⁽¹⁾ , 6.2.4 ⁽²⁾ and 6.2.9 ⁽¹⁾⁽²⁾ . See section 6 of this Certificate.
Standard:	7.1(a)(b)	Statement of sustainability
Comment:		The products can contribute to satisfying the relevant requirements of Regulation 9, Standards 1 to 6, and therefore will contribute to a construction meeting at least a bronze level of sustainability as defined in this Standard.
Regulation:	12	Building standards – conversion
Comment:		All comments given for the products under Regulation 9, Standards 1 to 6, also apply to this Regulation, with reference to clause 0.12.1 ⁽¹⁾⁽²⁾ and Schedule 6 ⁽¹⁾⁽²⁾ .
		(1) Technical Handbook (Domestic).
		(2) Technical Handbook (Non-Domestic).

The Building Regulations (Northern Ireland) 2012 (as amended)

Regulation:	23(1)(a)	Fitness of materials and workmanship
Comment:	(i)(ii)(b)	The products are acceptable. See sections 8 and 9 of this Certificate.
Regulation:	23(2)	Fitness of materials and workmanship
Comment:		The products are unrestricted by this Regulation. See section 2 of this Certificate.
Regulation:	28(b)	Resistance to moisture and weather
Comment:		The products can contribute to satisfying this Regulation. See section 3 of this Certificate.
Regulation:	30	Stability
Comment:		The products can contribute to satisfying this Regulation. See section 1 of this Certificate.
Regulation:	35(1)	Internal fire spread — Structure
Comment:		The products can contribute to satisfying this Regulation. See section 2 of this Certificate.
Regulation:	39(a)(i)	Conservation measures
Regulation:	40(2)	Target carbon dioxide emission rate
Regulation:	43(B)	Nearly zero-energy requirements for new buildings
Comment:		The products can contribute to satisfying these Regulations. See section 6 of this Certificate.

Additional Information

NHBC Standards 2025

In the opinion of the BBA, Teplo BFL Wall Ties, if installed, used and maintained in accordance with this Certificate, can satisfy or contribute to satisfying the relevant requirements in relation to *NHBC Standards*, Chapter 6.1 *External masonry walls*.

The opinion of the BBA does not amount to any endorsement or approval by NHBC and does not in any way guarantee that NHBC will approve such product / system as compliant with the NHBC Technical Requirements and Standards.

Fulfilment of Requirements

The BBA has judged Teplo BFL Wall Ties to be satisfactory for use as described in this Certificate. The products have been assessed as basalt fibre composite wall ties for use in tying masonry to timber, OSB, concrete or steel, in-situ masonry, masonry walls with M2 and moderately hydraulic lime mortar and, for Type 1 ties also M12 mortar, in new-build or retrofit constructions with a cavity width up to 400 mm (nominal).

ASSESSMENT

Product description and intended use

The Certificate holder provided the following description for the products under assessment. Teplo BFL Wall Ties are a range of composite wall ties comprising pultruded basalt fibres set into a resin matrix, with a helical ridge on the bar surface which acts as a drip feature (see Figure 1). Each Teplo BFL Wall tie has a moulded polymer piece at one end and a crimped L-shaped stainless steel piece at the other end, with a 7 mm fixing hole. Typical examples of the ties in use are shown in Figure 2.

The products have the nominal characteristics given in Tables 1 and 2.

Table 1 Nominal characteristics of Teplo BFL Wall Ties

Name	Wall tie Type ⁽¹⁾⁽³⁾	Wall tie Type ⁽²⁾	Diameter (mm)	Length (mm)	Cavity width – (mm)
TEPLO-BFL-5-155	6	3	5	155	76 - 100
TEPLO-BFL-5-180	6	3	5	180	101 - 125
TEPLO-BFL-5-205	6	3	5	205	126 - 150
TEPLO-BFL-5-230	6	3	5	230	151 - 175
TEPLO-BFL-5-255	6	3	5	255	176 - 200
TEPLO-BFL-7-155	6	2	7	155	76 - 100
TEPLO-BFL-7-180	6	2	7	180	101 - 125
TEPLO-BFL-7-205	6	2	7	205	126 - 150
TEPLO-BFL-7-230	6	2	7	230	151 - 175
TEPLO-BFL-7-255	6	2	7	255	176 - 200
TEPLO-BFL-7-280	6	2	7	280	201 - 225
TEPLO-BFL-7-305	6	2	7	305	226 - 250
TEPLO-BFL-7-330	6	2	7	330	251 - 275
TEPLO-BFL-7-355	6	2	7	355	276 - 300
TEPLO-BFL-7-380	6	3	7	380	301 - 325
TEPLO-BFL-7-405	6	3	7	405	326 - 350
TEPLO-BFL-7-430	6	3	7	430	351 - 375
TEPLO-BFL-7-455	6	3	7	455	376 - 400

(1) Type classification as defined in BS EN 1995-1-1 : 2004

(2) Type classification as defined in PD 6697 : 2019

(3) All results were obtained using a 5 by 30 mm countersunk wood screw.

Figure 1 Teplo BFL Wall Ties

Ancillary Items

The Certificate holder recommends the following ancillary items for use with the products, but these materials have not been assessed by the BBA and are outside the scope of this Certificate:

- concrete — typical strength C25/C30 with Teplo BFL wall ties
- brick or block masonry units — to BS EN 771 : 2011, Parts 1 to 6
- OSB board — to engineers' specification
- Insulation
- Fixings — M6 bolt and standard washer (Internal Dia. 6.4 mm, External Dia. 11.8 mm, Thickness 1.4 mm on a steel plate
— 5 mm x 30 mm wood screws on timber plate

Applications

The products are intended for use in cavity widths from 76 to 400 mm with a minimum design embedment depth of 55 mm in the masonry bed joint. The polymer end pieces enable use of the ties with weaker mortar types. The number of ties used per square metre can be increased to achieve a stronger tie Type in accordance with PD 6697 : 2019. For example, a Type 3 tie may be able to give a performance in accordance with a Type 2 tie. This approach is outside the scope of this Certificate. For more information, the Certificate holder's advice should be sought.

Product assessment – key factors

The products were assessed for the following key factors, and the outcome of the assessment is shown below. Conclusions relating to the Building Regulations apply to the whole of the UK unless otherwise stated.

1 Mechanical resistance and stability

Data were assessed for the following characteristics.

1.1 Mechanical properties

1.1.1 Results of compressive load capacity tests are given in Table 2.

Table 2 Compressive load capacity

Product assessed	Assessment method	Requirement	Result
TEPLO-BFL-5-205 ⁽³⁾	BS EN 846-5 : 2012,	1050 N over a 150 mm cavity (cavity +15 mm) ⁽¹⁾	Pass
TEPLO-BFL-5-255 ⁽³⁾	BS EN 845-1 : 2013 and PD 6697 : 2019	650 N over a 200 mm cavity (cavity +15 mm) ⁽¹⁾	Pass
		650 N over a 200 mm cavity (cavity +15 mm) ⁽²⁾⁽⁴⁾	Pass
TEPLO-BFL-7-355 ⁽⁵⁾		1050 N over a 300 mm cavity (cavity +15 mm) ⁽¹⁾	Pass
		650 N over a 300 mm cavity (cavity +15 mm) ⁽²⁾⁽⁶⁾	Pass
TEPLO-BFL-7-455 ⁽⁷⁾		650 N over a 400 mm cavity (cavity +15 mm) ⁽¹⁾	Pass

TEPLO-BFL to substrate types:

- (1) TEPLO-BFL fixed to a Steel plate substrate with a M6 bolt and standard washer (Internal Dia. 6.4 mm, External Dia. 11.8 mm, Thickness 1.4 mm)
- (2) TEPLO-BFL fixed to a Timber substrate with a 5 mm x 30 mm wood screws
- (3) Tie Type 3 in M2 mortar and Moderately Hydraulic Lime mortar to PD 6697 : 2019.
- (4) Tie Type 6 in M2 mortar and Moderately Hydraulic Lime mortar to PD 6697 : 2019.
- (5) Tie Type 3 in M2 mortar and Moderately Hydraulic Lime mortar to PD 6697 : 2019.
- (6) Tie Type 6 in M2 mortar and Moderately Hydraulic Lime mortar to PD 6697 : 2019.
- (7) Tie Type 3 in M2 mortar and Moderately Hydraulic Lime mortar to PD 6697 : 2019.

1.1.2 Results of tensile load capacity tests are given in Table 3.

Table 3 Tensile load capacity

Product assessed	Assessment method	Requirement	Result
TEPLO-BFL-5-205 ⁽³⁾	BS EN 846-5 : 2012,	1100 N over a 150 mm cavity ⁽¹⁾	Pass
TEPLO-BFL-5-255 ⁽³⁾	BS EN 845-1 : 2013 and PD 6697 : 2019	1100 N over a 200 mm cavity ⁽¹⁾	Pass
		650 N over a 200 mm cavity ⁽²⁾⁽⁴⁾	Pass
TEPLO-BFL-7-355 ⁽⁵⁾		2500 N over a 300 mm cavity ⁽¹⁾	Pass
		1100 N over a 300 mm cavity ⁽²⁾⁽⁶⁾	Pass
TEPLO-BFL-7-455 ⁽⁷⁾		2500 N over a 400 mm cavity ⁽¹⁾	Pass

TEPLO-BFL to substrate types:

- (1) TEPLO-BFL fixed to a Steel plate substrate with a M6 bolt and standard washer (Internal Dia. 6.4 mm, External Dia. 11.8 mm, Thickness 1.4 mm)
- (2) TEPLO-BFL fixed to a Timber plate substrate with a 5 mm x 30 mm wood screws
- (3) Tie Type 3 in M2 mortar and Moderately Hydraulic Lime mortar to PD 6697 : 2019.
- (4) Tie Type 6 in M2 mortar and Moderately Hydraulic Lime mortar to PD 6697 : 2019.
- (5) Tie Type 3 in M2 mortar and Moderately Hydraulic Lime mortar to PD 6697 : 2019.
- (6) Tie Type 6 in M2 mortar and Moderately Hydraulic Lime mortar to PD 6697 : 2019.
- (7) Tie Type 3 in M2 mortar and Moderately Hydraulic Lime mortar to PD 6697 : 2019.

1.2 On the basis of data assessed, the wall ties are suitable for use as defined in PD 6697 : 2019, for the following applications:

- Tie Type 1 — Masonry: heavy duty
- Tie Type 3 — Masonry: general purpose
- Tie Type 3 — Masonry: basic
- Tie Type 4 — Masonry: light duty
- Tie Type 6 — Masonry to timber

2 Safety in case of fire

Data were assessed for the following characteristics.

2.1 Reaction to fire

The Certificate holder has not declared a reaction to fire classification in accordance with BS EN 13501-1 : 2018.

2.2 Resistance to fire

2.2.1 The result of a resistance to fire test at elevated temperatures is given in Table 4.

Table 4 Resistance to fire

Product assessed	Assessment method ⁽¹⁾	Requirement	Result ⁽¹⁾
Teplo BFL wall ties under a tensile load of 1.8 kN	BS EN 846-6 : 2012 and BS EN 1996-1-2 : 2005	Value achieved	120 mins (integrity)

(1) Copies of test report are available on request to the Certificate holder.

2.2.2 On the basis of data assessed, the products will be unrestricted under the documents supporting the national Building Regulations.

2.2.3 In England and Wales, the products are unrestricted by Regulation 7(2), as an exempted material in Regulation 7(3).

2.2.4 Guidance on the fire-resistance of cavity walls is given in BS EN 1996-1-1 : 2005, BS EN 1996-1-2 : 2005, BS EN 1996-2 : 2006 and BS EN 1996-3 : 2006 and their UK national Annexes, and PD 6697 : 2019.

3 Hygiene, health and the environment

Data were assessed for the following characteristics.

3.1 Weathertightness

3.1.1 The water-shedding details of the ties are effective in preventing the transfer of water across the ties to the inner leaf. The helical ridge feature is continuous, ensuring the drip function is always present in the centre of the wall cavity or residual cavity between the insulation and the external leaf of the wall.

3.1.2 On the basis of data assessed, the products will not adversely affect the resistance of the wall to the passage of moisture, when used in an external cavity wall, and will be unrestricted under the documents supporting the national Building Regulations.

3.2 Condensation

Walls must be designed to limit the risk of interstitial and surface condensation. Guidance must be obtained from BS 5250 : 2021 and BRE Report 262 : 2002.

4 Safety and accessibility in use

Not applicable.

5 Protection against noise

Not applicable.

6 Energy economy and heat retention

Data were assessed for the following characteristics.

6.1 Thermal conductivity

6.1.1 The products achieved the thermal conductivities given in Table 5.

Table 5 Thermal conductivity

Product assessed	Assessment method	Requirement	Result
			Thermal conductivity $W \cdot m^{-1} \cdot K^{-1}$
Basalt Fibre (BFL) Tie bars ⁽¹⁾	PD 6697 : 2019,	Value achieved	0.71
Polymer End	BS EN 1996-1-1 : 2005 and	Value achieved	0.22
stainless steel end	BS EN 1996-1-2 : 2005	Value achieved	17.00

(1) Composite material for Teplo BFL Wall Ties.

6.1.2 On the basis of the data assessed, the products have a low thermal conductivity and are unrestricted in use under the documents supporting the national Building Regulations.

6.2 Thermal performance

6.2.1 Calculations of thermal transmittance (U value), including corrections for wall ties if required, must be carried out in accordance with BS EN ISO 6946 : 2017 and BRE Report 443 : 2019 using the thermal conductivities given in Table 5 of this Certificate.

6.2.2 The U value of a completed cavity wall will depend on the selected insulation thickness, the insulating value of the substrate masonry and its internal finish.

7 Sustainable use of natural resources

Not applicable.

8 Durability

8.1 The potential mechanisms for degradation and the known performance characteristics of the materials in the products were assessed.

8.2 Service life

Under normal service conditions, the products will have a life in excess of 60 years, provided they are designed, installed and maintained in accordance with this Certificate and the Certificate holder's instructions.

PROCESS ASSESSMENT

Information provided by the Certificate holder was assessed for the following factors:

9 Design, installation, workmanship and maintenance

9.1 Design

9.1.1 The design process was assessed by the BBA, and the following requirements apply in order to satisfy the performance specified in this Certificate.

9.1.2 Teplo BFL Wall Ties must be used in accordance with the requirements of BS EN 1996-1-1 : 2005, BS EN 1996-1-2 : 2005, BS EN 1996-2 : 2006, BS EN 1996-3 : 2006 and their UK National Annexes, and PD 6697 : 2019.

9.1.3 Structures of masonry walls incorporating the ties must be constructed in accordance with the following technical specifications:

- BS EN 1996-1-1 : 2005, BS EN 1996-1-2 : 2005, BS EN 1996-2 : 2006, BS EN 1996-3 : 2006 and their UK National Annexes, and PD 6697 : 2019
- the national Building Regulations.

9.1.4 The masonry wall mortar joint thickness must be a minimum of 10 mm and in accordance with BS EN 845-1 : 2013. If the ties are to be used in mortar joints with a thickness greater than 13 mm, guidance must be obtained from the Certificate holder.

9.1.5 The products must be designed to have a minimum embedment length of 55 mm in accordance with BS EN 845-1 : 2013.

9.1.6 The products incorporate a helical ridge on the bar surface to prevent water transfer across the tie (see Figure 1).

9.1.7 Ties must be evenly distributed over the wall area, except around openings, and must preferably be staggered.

9.1.8 It is possible to increase the number of ties used per m² to achieve a stronger tie Type in accordance with PD 6697 : 2019. For example, a Type 3 tie may be able to give a performance in accordance with a Type 2 tie by using a greater number of ties per m². This approach is outside the scope of this Certificate. For more information, the Certificate holder's advice must be sought.

9.1.9 At the vertical edges of an opening, unreturned or unbonded edges, and vertical expansion joints, additional ties must be used at a rate of one per 300 mm height, located not more than 225 mm from the edge.

9.2 Installation

9.2.1 Installation instructions provided by the Certificate holder were assessed and judged to be appropriate and adequate.

9.2.2 Installation must be carried out in accordance with this Certificate, the requirements of BS EN 1996-1-1 : 2005, BS EN 1996-1-2 : 2005, BS EN 1996-2 : 2006 and BS EN 1996-3 : 2006 and their UK National Annexes, and PD 6697 : 2019, and the Certificate holder's instructions.

Procedure

9.2.3 For installation into all inner leaf substrates, the tie must be secured through the hole of the L-shaped piece into the inner leaf. Ideally, the outer leaf brickwork must be kept one course clear during the installation of the ties and then built up to the protruding end, ensuring the tie is bedded on and surrounded by fresh mortar. The tie must achieve a minimum embedment of 55 mm in the outer leaf mortar bed joint.

9.2.4 The first run of ties is to be laid as near as possible, though not directly on, the damp-proof course. As construction proceeds, they must be fixed into the inner leaf and built into the outer leaf as required.

9.2.5 The tie must be installed at right angles to the walls and, to avoid the ingress of water, and must be horizontal or with a slight fall towards the outer leaf.

9.2.6 All inner leaf fixings must be able to achieve the necessary pull-out strength to meet the required tie type.

9.2.7 Installed ties must be clear of mortar droppings to prevent water from crossing to the inner masonry leaf.

9.2.8 Where used in partially filled cavity applications:

- insulation should be cut/notched as necessary to fit closely around the ties (and abut the adjacent board, slab or batt)
- insulation retaining clips must be pushed up against the insulation to hold it securely in place against the inner leaf.

9.2.9 Typical installation details of Teplo BFL Wall Ties are shown in Figure 2.

Figure 2 Typical examples of Teplo BFL Wall Ties in use

9.3 Workmanship

Practicability of installation was assessed by the BBA, on the basis of the Certificate holder's information. To achieve the performance described in this Certificate, installation of the products must be carried out by a competent general builder, or a contractor, experienced with these types of products.

9.4 Maintenance and repair

As the products are confined within the wall cavity and have suitable durability, maintenance is not required.

10 **Manufacture**

10.1 The production processes for the products have been assessed, and provide assurance that the quality controls are satisfactory according to the following factors:

10.1.1 The manufacturer has provided documented information on the materials, processes, testing and control factors.

10.1.2 The quality control operated over batches of incoming materials has been assessed and deemed appropriate and adequate.

10.1.3 The quality control procedures and product testing to be undertaken have been assessed and deemed appropriate and adequate.

10.1.4 The process for management of non-conformities has been assessed and deemed appropriate and adequate.

10.1.5 An audit of each production location was undertaken, and it was confirmed that the production process was in accordance with the documented process, and that equipment has been properly tested and calibrated.

† 10.2 The BBA has undertaken to review the above measures on a regular basis through a surveillance process, to verify that the specifications and quality control operated by the manufacturer are being maintained.

11 Delivery and site handling

11.1 The Certificate holder stated that the products are delivered to site in card boxes bearing the product name, Certificate holder's name, batch number, and weight of contents in kilograms.

11.2 Delivery and site handing must be performed in accordance with the Certificate holder's instructions and this Certificate.

Supporting information in this Annex is relevant to the products but has not formed part of the material assessed for the Certificate.

Construction (Design and Management) Regulations 2015

Construction (Design and Management) Regulations (Northern Ireland) 2016

Information in this Certificate may assist the client, designer (including Principal Designer) and contractor (including Principal Contractor) to address their obligations under these Regulations.

Management Systems Certification for production

The management system of the manufacturer has been assessed and registered as meeting the requirements of BS EN ISO 9001 : 2015 by Polish Chamber of foreign Trade Certification (Certificate 459/2006).

BS EN 1996-1-1 : 2005 *Eurocode 6 : Design of masonry structures — General rules for reinforced and unreinforced masonry structures*

NA to BS EN 1996-1-1 : 2005 + A1 : 2012 *UK National Annex to Eurocode 6 : Design of masonry structures — General rules for reinforced and unreinforced masonry structures*

BS EN 1996-1-2 : 2005 *Eurocode 6 : Design of masonry structures — General rules — Structural fire design*

NA to BS EN 1996-1-2 : 2005 *UK National Annex to Eurocode 6 : Design of masonry structures — General rules — Structural fire design*

BS EN 1996-2 : 2006 *Eurocode 6 : Design of masonry structures — Design considerations, selection of materials and execution of masonry*

NA to BS EN 1996-2 : 2006 *UK National Annex to Eurocode 6 : Design of masonry structures — Design considerations, selection of materials and execution of masonry*

BS EN 1996-3 : 2006 *Eurocode 6 : Design of masonry structures — Simplified calculation methods for unreinforced masonry structures*

NA + A1 : 2014 to BS EN 1996-3 : 2006 *UK National Annex to Eurocode 6 : Design of masonry structures — Simplified calculation methods for unreinforced masonry structures*

BS EN 13501-1 : 2018 *Fire classification of construction products and building elements - Classification using data from reaction to fire tests*

BS EN ISO 6946 : 2017 *Building components and building elements — Thermal resistance and thermal transmittance — Calculation method*

BS EN ISO 9001 : 2015 *Quality management systems — Requirements*

PD 6697 : 2019 *Recommendations for the design of masonry structures to BS EN 1996-1-1 and BS EN 1996-2*

Conditions of Certificate

Conditions

1 This Certificate:

- relates only to the product that is named and described on the front page
- is issued only to the company, firm, organisation or person named on the front page – no other company, firm, organisation or person may hold or claim that this Certificate has been issued to them
- has to be read, considered and used as a whole document – it may be misleading and will be incomplete to be selective
- is copyright of the BBA
- and any matter arising out of or in connection with it or its subject matter (including non-contractual disputes or claims) is governed by and construed in accordance with the law of England and Wales.
- the courts of England and Wales shall have exclusive jurisdiction to settle any matter arising out of or in connection with this Certificate or its subject matter (including non-contractual disputes or claims).

2 Publications, documents, specifications, legislation, regulations, standards and the like referenced in this Certificate are those that were current and/or deemed relevant by the BBA at the date of issue or reissue of this Certificate.

3 This Certificate will be displayed on the BBA website, and the Certificate Holder is entitled to use the Certificate and Certificate logo, provided that the product and its manufacture and/or fabrication, including all related and relevant parts and processes thereof:

- are maintained at or above the levels which have been assessed and found to be satisfactory by the BBA
- continue to be checked as and when deemed appropriate by the BBA under arrangements that it will determine
- are reviewed by the BBA as and when it considers appropriate.

4 The BBA has used due skill, care and diligence in preparing this Certificate, but no warranty is provided.

5 In issuing this Certificate the BBA is not responsible and is excluded from any liability to any company, firm, organisation or person, for any matters arising directly or indirectly from:

- the presence or absence of any patent, intellectual property or similar rights subsisting in the product or any other product
- the right of the Certificate holder to manufacture, supply, install, maintain or market the product
- actual installations of the product, including their nature, design, methods, performance, workmanship and maintenance
- any works and constructions in which the product is installed, including their nature, design, methods, performance, workmanship and maintenance
- any loss or damage, including personal injury, howsoever caused by the product, including its manufacture, supply, installation, use, maintenance and removal
- any claims by the manufacturer relating to UKCA marking and CE marking.

6 Any information relating to the manufacture, supply, installation, use, maintenance and removal of this product which is contained or referred to in this Certificate is the minimum required to be met when the product is manufactured, supplied, installed, used, maintained and removed. It does not purport in any way to restate the requirements of the Health and Safety at Work etc. Act 1974, or of any other statutory, common law or other duty which may exist at the date of issue or reissue of this Certificate; nor is conformity with such information to be taken as satisfying the requirements of the 1974 Act or of any statutory, common law or other duty of care.
